ABOUT US

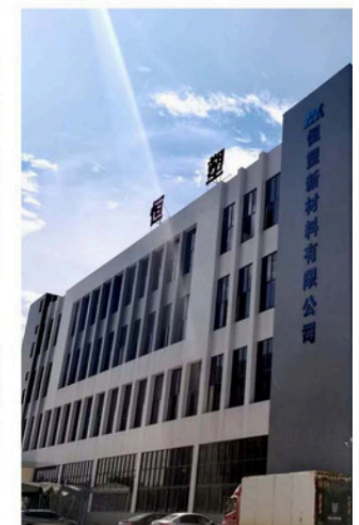

Dongguan Hengsu New Material Co., Ltd. is a professional manufacturer and exporter of PVC, ABS, PMMA and acrylic edge banding, as well as hot melt adhesive for furniture and interior applications.

With more than 10 years of manufacturing experience and stable export supply capability, Hengsu provides reliable edge banding solutions to customers worldwide.

We focus on color consistency, smooth surface finish and stable bonding performance.

Markets: Middle East, Southeast Asia, South America and North America
Business Type: Manufacturer / OEM & ODM Supplier

WHY CHOOSE HENGSU EDGE BANDING

Hengsu edge banding is designed to finish and protect the exposed edges of MDF, plywood, particle board, and HPL panels. Our products combine decorative aesthetics with long-term durability.

Key Benefits:

- Smooth and defect-free surface
- Stable color and gloss consistency
- Good flexibility and impact resistance
- UV resistance for indoor furniture
- Cost-effective solution for furniture manufacturers

PVC EDGE BANDING

PVC edge banding is designed to protect and decorate the exposed edges of MDF, plywood, particle board, and laminated panels.

Features:

- Wear-resistant
- Flexible & durable
- Smooth surface finish
- Strong adhesion with hot melt glue

Applications:

Kitchen cabinets, wardrobes, office furniture, interior projects.

Available Sizes:

Thickness: 0.4 – 3mm

Width: 12 – 650mm

ABS EDGE BANDING

ABS edge banding offers high impact resistance and a premium surface finish for furniture applications.

- Smooth, defect-free surface
- Stable color and gloss consistency
- Good flexibility and impact resistance
- Suitable for quality-focused indoor furniture
- Reliable processing performance
- Cost-effective solution for furniture manufacturers

PRODUCT DESCRIPTION:

The use of ABS edge banding, both from the temperature resistance, stability, environmental protection and other aspects to evaluate, are better than PVC edge banding. ABS edge can be high temperature to 99 degrees when the state changes only, but no matter what the material of the edge of the insulation deformation, it will lead to deformation of the plate and other conditions.

3D EDGE BANDING

3D edge banding provides realistic wood grain textures with depth and natural appearance.

Features:

- Realistic 3D texture
- Strong bonding performance
- Decorative design
- Natural wood effect

Applications:

Luxury furniture, decorative panels, modern interiors.

PRODUCT DESCRIPTION:

1. Good anti-ultraviolet.
2. Good resistance to yellowing
3. Cut back to white.
4. Batch product quality and stability.
5. Surface scratch resistance, wear resistance is good.
6. Not easy to deformation, not easy to aging.

HOT MELT GLUE

OUR HOT MELT ADHESIVE IS SPECIALLY DEVELOPED FOR PVC, ABS, AND 3D EDGE BANDING.

Features:

- Strong bonding strength
- Fast setting
- EVA / PUR options available
- Suitable for automatic edge banding machines
